WikiEducator's Recognition To Tripura Scientist As Author

May 8, 2021 / east turn / No Comments

Agartala: [Tripura](#) chemical scientist Dr Arijit Das has been given recognition as an Author by WikiEducator. Das has been given recognition for his contribution to the scientific discipline of chemistry and his achievements in the field of innovation.

WikiEducator is an international online community project for the collaborative development of learning materials, which educators are free to reuse, adapt and share without restriction. WikiEducator was launched in 2006. On 1 July 2009, WikiEducator became an independent entity, headquartered at the new International Centre for Open Education at Otago Polytechnic in Dunedin, New Zealand.

Dr Das is now authorized to create online resources for learners in the field of chemical education.

After being approved as author, Dr Arijit Das who is an Assistant Professor in BBMC college of Agartala has included five chapters of chemistry in the WikiEducator so far.

Earlier in 2020-2021, Dr Das' methodologies and formulae had been indexed in the digital library, 'Education Resources Information Centre (ERIC)', United States Department of Education in the form of nine articles and Library of University of California, Davis, US in the form of eight articles.

Scientist Dr Arijit Das' formulae based educational tools have also been indexed in the famous City college of New York (CCNY) in 2017 & 2019. In September 2019, his book 'Innovative Mnemonics in Chemical Education: A Handbook for Classroom Lectures' was published by Cambridge Scholars, UK, and indexed in the British Library, London.

Dr Das has been a member of prestigious American Chemical Society (ACS), NY, US since December 2013 in the category of Chemical Education.
