Dr. Arijit Das's new website for chemistry students By Our Correspondent

Agartala, July 20, 2013 : Tirelessly pursuing his mission of contributing to the welfare of students of his subject , Tripura's eminent and highly-decorated Chemist Dr Arijit Das has launched a website exclusively meant to provide online guidance on the study of chemistry and preparation for competitive exams to students of all hues. Dr Das's labour of love embodied in www.drarijtdaschem.in is designed to provide all-round help and guidance to students for the study of chemistry. 'The site is categorized into specific sections like '**Student Corner**' from where students can download previous years question papers of **IIT, JEE (Main and Advance), CBSE, AIEEE, PMT and NEET since 2004 in free access mode**' said Dr. Das.

Apart from this, from the category titled '**Teaching Methodology**' students can freely download newly invented formulae (Full PDF paper of the journal). These sections are enriched by a different category titled '**Menu**' where there is a **cultural view and eminent profiles** by studying which students can enrich their knowledge and gain in new ideas to inspire themselves. In the Section '**Press Release**' there are PDF files on all press notes.

While expressing his hope that his new website will go a long way in helping students study and gather authentic knowledge of chemistry Dr Das said that he would welcome any meaningful suggestion to further improve the site by incorporating new sections and categories . **Dr Das who has been recently felicitated by the chief minister Manik Sarkar for contribution to study of chemistry in the 8th All Tripura Open Mega Quiz-2013 organized by state's highest-accessed website tripurainfo.com in Agartala Town Hall on July 7 has already created a ripple in the exalted world of chemistry by inventing seven new methodologies and ten new formulae.** 'I am still working hard to evolve more new and easier methodologies and formulae for study of chemistry to help students' Dr Das said. He is currently posted as Head of the Department (HOD), Chemistry in government run Dharmanagar Degree College of north Tripura.
