

Final authentication of Dr Arijit Das's innovation: IJAR publish formulae

By Our Correspondent

Agartala, Jul 02, 2013 : Despite mean and envious attempts at leg-pulling by a group of local chemistry teachers , Dr Arijit Das, head of the department (HOD) of chemistry in government run Dharmanagar college , the man who devised new and easier five methods of study of Hybridization, Bond order and IUPAC nomenclature of bicycle and Spiro compounds has added another feather to his already swollen and scholarly cap . The celebrated 'Indian Journal of Applied Research' (international index double reviewed journal having impact factor-0.8215-2012) has published his innovative and easier methods devised after due and painstaking authentication. The authenticated findings of Dr Arijit Das has been published in the latest July-2013 issue of the journal. This is available in the website : www.ijar.in in open access mode.

While briefing this correspondent about the work he has done Dr Arijit Das said that he had only innovated new and easier methodologies for the study of the concerned chapters in chemistry proposed earlier by Sir G.Wilkinson , nobel awardee in chemistry in 1973. Dr Wilkinson was also a professor chemistry in celebrated Harvard university of USA. Besides , methodologies devised by Professor F.Albert Cotton , Texas university, Professor I.L. Finar , Professor R.T.Morrison , Professor R.N.Boyd , Professor R.L.Dutta , Professor J.D.Lee have also been modified by Dr Das .

After publication of Dr Das's findings in the Indian Journal of Applied Research (IJAR) congratulatory messages from a galaxy of scientists, researchers and professors of chemistry have come to him. He said that he is still working on devising new and easier methods of chemistry in its different parts.
